

66th Annual Meeting ICD European Section Amsterdam 2023

Dr Walter Van Driel organised a superb conference in Amsterdam with an excellent scientific programme and an overview of the ICD's humanitarian programme.

We were delighted to have a great turnout of Irish fellows to celebrate the induction of Dr Gillian Smith.

Registration opened on the Thursday evening with a drinks reception in The Hilton Hotel following which the Irish fellows and their partners had an impromptu dinner.

On Friday the scientific programme covering facial trauma - from single tooth to complex maxillo facial injuries - had some very impressive presentations. The partners programme included a visit to an outdoor exhibition of sculpture and a very relaxed cruise with lunch. That evening everyone boarded boats from the Hilton Hotel to Strand Zuid for a BBQ beach party with great food, live music and dancing.

Saturday started with optional tours to the Van Gogh Museum or a guided bicycle tour, both of which were very popular and over subscribed

That afternoon the induction ceremony started at 3.30pm Dr Gillian Smith - our Irish inductee - received a loud cheer from her Irish colleagues when she was presented. A champagne reception followed by the gala Dinner was the highlight of a great weekend.

All in all Amsterdam was a great trip which all the delegates and their partners thoroughly enjoyed.

We are now looking forward to Jerusalem in June 2024 - the details of this will follow in the coming months
